

EVISCERATION

BIRDS WASHER WITH FINGERS

DESCRIPTION

This machine positioned at the end of the eviscerating line washes out side the birds thanks to two rotating axes with rubber's fingers and efficient water sprayers. The frame and protections are made of stainless steel. The brushes are moved by separated motorgearbox.

TECHNICAL DATA

Capacity	6.000 B/h
Lenght	1.200 mm
Width	800 mm
Height	1.400 mm
Water cons. at 3 bar	1 l/h
Power installed	0,74 kw
Total weight	140 kg
Shipping volume	1 M³
