

CUT-UP

FILLETING MACHINE

DESCRIPTION

The automatic breast filleting machine C15 is specially developed to debone the breast caps. The machine is manually loaded and operates mechanically. On the machine can be add two extra modules, an automatic deskinning unit and a half breast two blades splitter. To get the best yield the weight difference of the birds in the flock cannot exceed 500gr and the cap should be cut at the wings joint. The machine is made of stainless steel and food approved PVC. The breast deboner is complete with electric control panel, safety device and CE certificate.

TECHNICAL DATA

Capacity	2.500 B/h
Lenght	3.700 mm
Width	1.050 mm
Height	2.000 mm
Power installed	2 kw
Total weight	900 kg
Shipping volume	6 M ³
