

WASTE TREATMENT

SCREW FILTER SEPARATOR

DESCRIPTION

This machine is used to separate from the water and lift into the container the feather and offal coming from the processing plant. At the bottom of the first section of the screw a Jonson filter with 0,5mm clearance separates from the water the feather and the offal. The screw keeps the filter clean thanks to brushes bolted on it. The machine is made of stainless steel.

TECHNICAL DATA

Model	RSU 500 RSU 700		
Capacity	140	360	m ³
Lenght	6.300	7.700	mm
Width	700	1.100	mm
Height	1650	900	mm
Water cons. at 3 bar	0,1	0,2	m ³ /h
Power installed	3	4	kw
Total weight	800	1.200	kg
Shipping volume	4	7,6	M ³
